Distinctive Unusual Parrot Tulips

By all means you should have some of these distinctive unusual Tulips. They are especially suitable for cutting, lasting several days under normal house conditions. All of the Parrot Tulips are most effective when grown in front of evergreens, or low-growing shrubs that will be in foliage in the spring.

BLUE PARROT. Large, very deeply cut and fringed heliotrope-blue flower in bloom outdoors about the middle of May. As good for growing indoors as it is in the garden. 24 inches high. **\$2.20 for 12; \$3.95 for 25; \$14.25 for 100**

FANTASY. Another lovable vagabond which has successfully thrown off the conventional Tulip form. Buds are like huge pointed candle flames of salmon-rose. The edges of the closed flower are informally curved and deeply laciniated, apple-green shadows rise from the outside base almost the entire length of the petals. When fully opened, we have a broad petalled flaring and loosely built flower of brilliant salmon-rose on a 22-inch stem. A true expression of rhythmic freedom. **\$1.65 for 12; \$3.00 for 25; \$11.25 for 100**

THERESE. A new top-notch Parrot of cherry-scarlet with the same unusually formed and distinctive petals. A very attractive flower both in the garden and when displayed in vases indoors. 24 inches tall. **\$1.80 for 12; \$3.35 for 25; \$12.25 for 100**

VIOLET QUEEN. Sometimes called "Opal Queen." Soft lavender-violet flower, distinct feathery appearance; large white center, tall (24-inch) straight, strong stem. Very lovely. **\$1.80 for 12; \$3.35 for 25; \$12.25 for 100**

MIXED COLORS. All of the above in a balanced mixture. **\$1.85 for 12; \$3.45 for 25; \$12.45 for 100**

The Lovely Single and Double Tulips FROM HOLLAND

We are among the largest importers of bulbs for retail re-sale purposes in the country, and have never imported anything but the very best and largest bulbs that can be purchased. These bulbs are of the finest quality that come out of Holland, grown for us by men who have proved themselves over a long period of years to be the best growers in Holland. Yearly trials enable us to see all of the new Tulips, Hyacinths and Narcissus before they are distributed to the public, so we can know positively that they deserve being offered through the pages of our catalog.

EARLY SINGLE FLOWERING TULIPS

These are the short, sturdy-stemmed, early flowering Tulips that are used in beds and borders where Tulips are to be followed with summer flowers. They are also used for cemetery plantings and for growing in places exposed to strong winds.

COULEUR CARDINAL. Fine rich deep cardinal-red flower of erect habit and tremendous lasting qualities. We recommend it very highly both for outdoor growing and for forcing indoors.

DE WET. Sweet scented. Beautiful deep orange, shaded golden yellow at the base of the petals and stippled bright orange-scarlet. Splendid to force indoors. Height 20 in.

DIANA. Immense pure white flowers are borne erect on strong 12-inch stems.

KEIZERSKROON. Brilliant carmine-scarlet with a broad yellow border. Very popular either for forcing indoors or growing in the garden. Height 18 in.

PINK BEAUTY. Bright glowing rose color, with a broad white flush through the center of the flower's outer petals. Very large, of shapely form and one of the most beautiful of all bedding Tulips. Grows 14 inches high.

VAN DER NEER. Rich plum color flower of beautiful form borne on a strong 12-inch stem. Forces indoors easily and is a splendid bedding variety.

ALL COLORS MIXED. A very well-balanced mixture of all the above colors. We know you will find it very satisfactory.

\$1.65 for 12; \$3.00 for 25; \$11.45 for 100

DOUBLE FLOWERING EARLY TULIPS

Double Tulips are used for formal beds and for bordering walks and drives. Their short sturdy stems also make them ideal for planting at the cemetery. They remain in bloom for a longer period than any other class of Tulip. Splendid for growing indoors.

MARECHAL NEIL. One of the most satisfactory of the double early blooming varieties. The color is clear butter-yellow flushed with rich orange. Grows 12 inches tall.

MR. VAN DER HOEF. Pure yellow, very double flower with no markings. Probably the very best clear yellow double. Grows 12 inches tall.

ORANGE NASSAU. Large warm orange-scarlet double flower. A beautiful bedding kind and very satisfactory for growing indoors. Grows 12 inches tall.

SCARLET CARDINAL. This is the very best scarlet, double early Tulip we have ever grown. A great Tulip to remain in bloom for a very long time. Grows 10 inches tall.

SNOWBALL. Pure white flowers on 12-inch stems. We think this the best early double flowering white variety.

VUURBAAK (Fire Dome). Fiery scarlet flowers on strong 12-inch stems. Not quite as choice as Scarlet Cardinal but very popular both for outdoors and for forcing.

DOUBLE FLOWERING MIXED COLORS. A good mixture of the above six varieties. Made right here in our warehouses.

\$1.65 for 12; \$3.00 for 25; \$11.45 for 100

PEONY-FLOWERED TULIPS

These tall-stemmed, very double flowering Tulips, with blooms 4 and 5 inches across, deserve a lot more attention than they have been given. They bloom in May and are splendid for growing in solid beds or for planting in groups of 6 to a dozen in the hardy plant or shrub border or among evergreens. Very sturdy growing and hold their giant flowers very erect. The kinds we list here grow from 22 to 24 inches tall.

BLUE FLAG (Bleu Celeste). Huge flowers of a pleasing shade of warm mauve-purple. Splendid for cutting for house decoration.

COXA. Large very double rich scarlet flowers daintily tipped with pure white. Most attractive.

EROS. Commands attention in every garden where it is grown. One of the very best Tulips in this magnificent class ever introduced. Very substantial flowers of clear old rose color on unusually strong stems even for this variety.

MOUNT TACOMA. Resembles a large, double, white Chinese Peony. Flowers are very large, often measuring 5 inches across. The best white of this kind.

OTTAWA. Clear golden yellow double flowers without a speck, spot or blemish to mar their sunny beauty. Plant this in combination with the variety Blue Flag. The effect is very pleasing.

UNCLE TOM. Deep glossy maroon-red flowers; really a distinct shade in Tulips. We recommend this variety for planting in groups between evergreens. Try it.

PEONY-FLOWERED MIXTURE. All of the above kinds in a splendid mixture of colors.

\$1.65 for 12; \$3.00 for 25; \$11.45 for 100

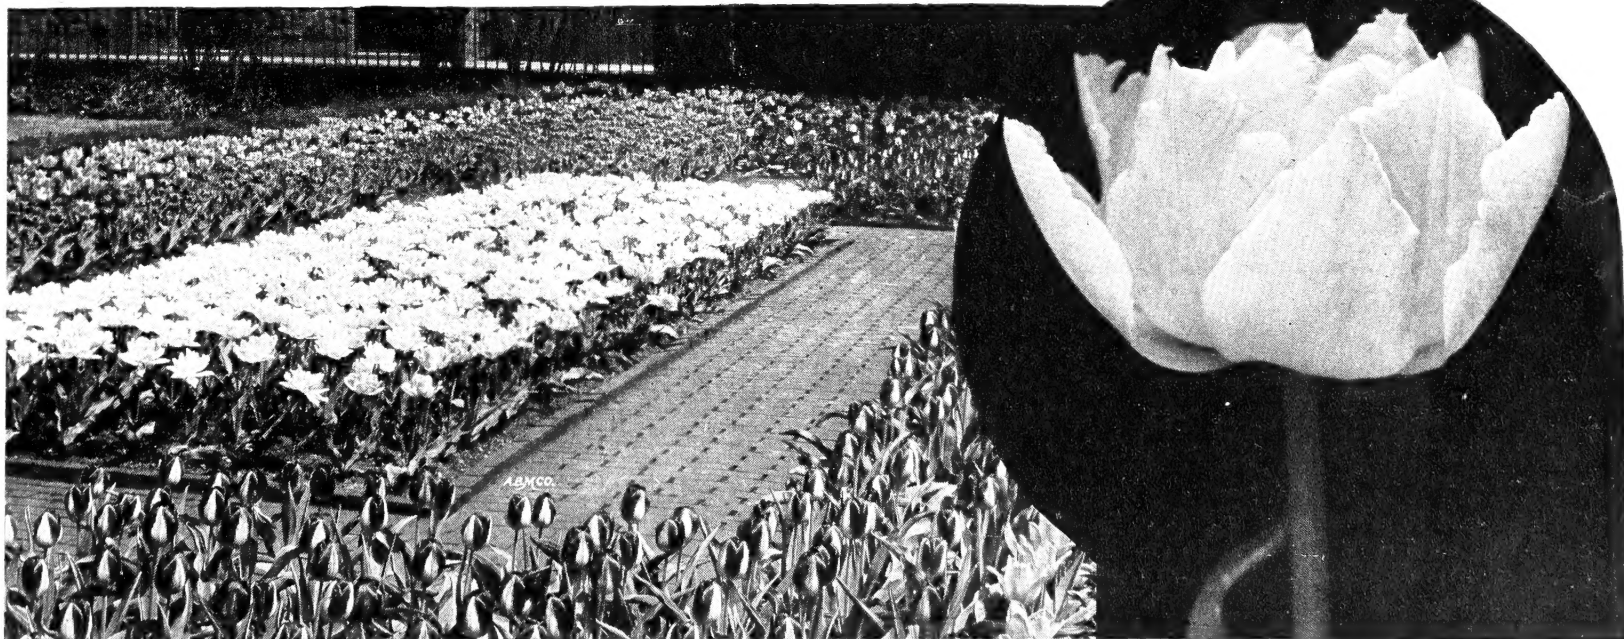

A TULIP WITH FIVE FLOWERS ON A SINGLE STEM—Pictured on Page 8

MONSIEUR MOTTET. The bunch-flowered or multi-flowered Tulip. Often has five flowers on a single stem. The color at first is snowy white; after a day or two it is flushed with a lovely soft pink. On some flowers the outer edge may be marked with red or maroon. A decorative and charming variety.

\$1.85 per doz.; \$3.45 for 25; \$12.45 for 100

Here Is the Way We Plant Tulip Bulbs

Bonemeal is spread on the ground where the bulbs are to be planted, using 10 pounds to each 100 square feet (10 x 10). The earth is then spaded to a depth of 18 inches, firmed down and raked smooth. The bulbs are then placed on top of the ground, about 6 inches apart, at the spot where they are to be planted. (Better effects are obtained where at least 6 bulbs of a variety are planted together. We keep them in groups of 25 to 50 of a kind.) A trowel digs out a hole 6 inches deep in which the bulb is set and the hole filled in with earth. The important item of food for the bulb comes next. Tulips, Hyacinths, Narcissus, etc., make their roots right after they are set out in the fall. Large blooms come from bulbs that have large root growth, and large root growth comes from proper feeding. Any complete plant food is good, spreading it on the ground after the bulbs have all been set, using 5 lbs. to each 100 square feet. We finish up with a smooth raking for it will be too late to do this in the spring when the Tulips are breaking through the ground.

Narcissus - Daffodils

Narcissus and Daffodils are very easy to grow in the garden, for they thrive in any good soil and in just about any location. Plant them in clumps of six to a dozen bulbs among the perennial plants and in the foreground of shrubbery and evergreens. Planted in large masses through woodlands and along hillsides and in meadows they give a most pleasing effect. They will increase in beauty and number without any special care and soon become permanently established. Plant Narcissus bulbs about 4 inches deep and 6 inches apart and get them into the ground as early in the fall as possible.

PLANTING TABLE FOR PLANTS AND BULBS

Planting: The table below shows the number of plants or bulbs required to fill a circular bed of the dimensions given. In planting, begin at outside row—where 6 inches apart, 3 inches from edge of bed; where 12 inches apart, 6 inches from edge of bed. It is customary among professionals in planting a bed to set the plants or bulbs somewhat closer together in the two other rows, giving more space between each plant or bulb toward the center of the bed. A square bed will take about the same number of plants. For an oval bed, add length and breadth and divide by 2. For example, an oval 9 ft. long by 7 ft. wide will require the same number of plants as a circular bed 8 ft. in diameter.

Diameter of Bed	6 Inches Apart	12 Inches Apart	18 Inches Apart	Diameter of Bed	6 Inches Apart	12 Inches Apart	18 Inches Apart
3 feet	28	7		12 feet	452	113	50
4 feet	48	12	6	13 feet	528	132	59
5 feet	80	20	8	14 feet	612	153	68
6 feet	112	28	13	15 feet	704	176	78
7 feet	152	38	17	16 feet	804	201	89
8 feet	200	50	23	17 feet	904	226	100
9 feet	256	64	28	18 feet	1016	254	113

11 feet	380	95	42	20 feet	1256	314	139

Please remember when reading this bulb book that we import only top-size, first quality bulbs. The very cream of the crop grown by some of the most expert bulb growers in Holland. These top size bulbs may cost a little more but they are most certainly worth it.

NATURALIZING DAFFODILS

One of the finest things that can be done with a piece of open, waste land is to plant it broadcast with hundreds of Daffodil bulbs. While they will not endure complete shade, any open, semi-shaded area will suit them, and they will riot with the utmost freedom in a sloping meadow, particularly at the sides of streams or small lakes.

When Daffodils are to be naturalized, they should not be planted in regular rows or at even distances apart. The best thing is to carry a basket of bulbs over the ground, spilling them irregularly and planting the bulbs where they fall. It will take several years to achieve the full value of a naturalistic planting, and the Daffodils should be left entirely undis-

turbed during that period. The foliage should never be cut off, but allowed to ripen and wither away naturally.

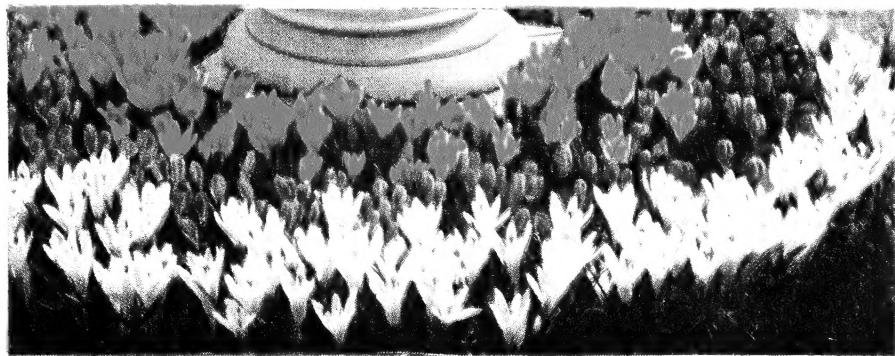

A Mixture of Narcissus and Daffodils for Naturalizing

An excellent mixture of the varieties in all the classes of Narcissus and Daffodils described here. A planting of this mixture may show you some varieties you do not now know and may want in larger quantities in your garden. \$1.65 for 12; \$3.00 for 25; \$11.25 for 100, prepaid to you.
